

Christian Pasquali

Economics and Applied Statistics Student at the University of Toronto Mississauga

Toronto, Canada • christian.g.pasquali@gmail.com • (437) 775-0040 • cgp05.github.io • github.com/cgp05

Education

University of Toronto Mississauga

Mississauga, Ontario

HBA in Economics major, Applied Statistics minor, Political Science minor

May 2028

Honours Bachelor of Arts (HBA), expected May 2028

- Focus on econometrics, applied statistics, public policy, programming, and quantitative economic analysis.

Projects

Wikipedia LOESS Time Series Data Pipeline

May 2026 – present

- Built an ETL pipeline in R to extract, clean, and structure 100+ public opinion polls with over 150k individual data points from Wikipedia into CSV, as well as LOESS smoothers using ggplot2 to track non-parametric public opinion trends.
- Developed a Python script with requests and pandas to automatically scrape the Wikipedia page for new polls and update the CSV file.

Canadian Macroeconomic Growth Statistical Analysis Paper

Feb 2026 – Apr 2026

- Co-authored a quantitative research paper analyzing federal fiscal policy and using multi-variable OLS regression models in Python (Jupyter notebook) with the statsmodels library.

Toronto Housing Development Research Paper

Feb 2026 – Apr 2026

- Authored a 2000 word policy analysis evaluating environmental remediation, flood plain protection, and economic development for Toronto's 1.25 billion CAD Port Lands project.
- Analyzed municipal zoning, housing supply targets, and public transit expansion to assess urban infrastructure and commercial growth potential.

Experience

Information Officer

Toronto, Ontario

Elections Canada

Apr 2025

- Interacted with 1,000+ voters to guide them and ensure strict protocol compliance during electoral processes.

Merchandise Processor (seasonal)

Toronto, Ontario

Terry Fox Foundation

May 2020 – Aug 2024

- Processed and organized orders charitable fundraising merchandise, ensuring attention to detail and persistence in repetitive tasks.

Skills

Programming & Modeling: Python (pandas, numpy, statsmodels), R (ggplot2, dplyr), SQL (SQLite), Jupyter Notebooks, Stata

Analytics & Tools: Excel (Pivot Tables, VLOOKUP, XLOOKUP), Git, GitHub, LaTeX, Linux (Ubuntu), OLS Regression
